

TECHNICAL DATA

length	660 mm
width	160 mm
height	160 mm
weight	14.00 kg
plunger diameter	20 mm
plunger stroke	100 mm
compression ratio	1:10
pumped volume per 1 stroke	31,4 cm ³
air consumption per 1 stroke	7.8 l
average number of strokes per 1 minute	30
maximum filling pressure (conditions during testing)	240 bar

Pumping rate is dependent on the type of gas, the pressure difference between the one in source and inflated cylinder and actual number of strokes per minute. This amount is variable and depends on the pressure in the cylinders.
